Venue booking platform - Nodejs, Express js, JWT , Database design, React js, Next js, Redux toolkit

- A platform designed for searching wedding and event venues, comparing prices, and booking in real time.
- Role-based dashboard (Admin, Venue Owner, User), real-time calendar, media uploads, and secure payment processing.
- Modular backend architecture, JWT authentication, password protection with bcrypt, and seamless frontend-backend integration (Axios, REST API).

Skill Exchange Platform — Express.js, React, TypeScript, PostgreSQL, JWT, TailwindCSS, Docker

- A full-stack platform where users can share their skills and offer services to each other.
- Frontend: Responsive UI built with React + TypeScript, form validation, state management using Context API, and API integration via Axios.
- Backend: Modular architecture with Express.js, JWT authentication, role-based access control, OTP email verification, and password security using bcrypt.
- Database: Normalized schema with PostgreSQL to ensure data integrity and efficient queries; containerized environment and deployment using Docker.

ISH TAJRIBASI

UzVip

Frontend

2025.02.01

Tashkent

developer

- I developed the frontend of several web applications for the company using **ReactJS**, Next.js, and TailwindCSS, creating modern and user-friendly interfaces for clients.
- I optimized the existing codebase by breaking it into reusable components and improving state management with React Hooks, making the code cleaner, more maintainable, and easier to scale.
- I integrated the frontend with backend APIs and optimized the data flow using Axios and JWT, enabling secure user interactions and real-time data handling.
- Within the team, I streamlined Git workflows (branch management, commits, and PR reviews), which improved code quality and made it easier to detect and resolve issues quickly.

Frontend developer

Toshkent

2025/05

- I developed a pixel-perfect, high-performance website from scratch based on the company's Figma designs, ensuring an optimal UI/UX experience.
- While working on these company projects, I also implemented 3D animations using Three.js, creating interactive animations and smooth motion effects to enhance the user experience.
- I reviewed my resume to ensure it is clear, professional, and easy to read — avoiding clutter such as excessive colors, multiple fonts, or overly dense information — so that it effectively reflects my skills and professionalism.

LEADERSHIP EXPERIENCE

PDP University

Toshkent

Event manager

2025/03

- As an Event Manager for the Google Devs Event at PDP University, I actively contributed to organizing and managing tech-focused events for students.
- I handled participant registration and session scheduling, ensuring the event ran smoothly and efficiently.
- Working closely with the team, I quickly resolved on-the-spot issues, guided participants, and coordinated with mentors to maintain seamless communication throughout the event.
- As a result, the event successfully hosted 500+ students, received positive feedback from both participants and mentors, and was praised for its high organizational quality.

Interests / Knowladges

Knowladges:

- **Backend development:** Node.js (Express.js, NestJS),
- **Data base:** PostgreSQL, Prisma, Entity Framework,
- **Real-time:** WebSocket, Socket IO
- **Frontend:** React, Next.js, HTML5, CSS3, TypeScript, TailwindCSS, MUI, Shadcn UI
- **Version control:** Git, GitHub, GitLab
- **DevOps & CI/CD:** Docker, GitHub Actions, bash skriptlar, AWS (asosiy darajada)
- **Project management:** Trello, Notion, Jira (asosiy darajada)
- **Testing:** Postman, Swagger, Jest,(asosiy darajada)
- **Telegram bot API:** Node.js orqali grammy, iogram (praktik tajriba)
- **Automation & No-code:** n8n (workflow automation)

Languages:

- **O'zbek-** native
- **English** - intermediate
- **Rus tili** - Basic
